

JOLLY PHONICS – TRAINING COURSES

The Jolly Phonics training course has been carefully designed to provide teachers with the specific knowledge to implement the Jolly Phonics programme in their schools.

Jolly Phonics is based on Synthetic Phonics, the most effective way to teach children how to read and write. It is multisensory, fun, and engaging.

The training is generally organised in one day (see training programme). This way the teachers will be given full explanation of:

- The principles behind Jolly Phonics; theory and research.
- How Jolly Phonics works.
- The five basic skills for reading and writing.
- Independent reading; decodable books.
- Independent writing.
- Resources and materials - classroom resources, decodable readers, Jolly Phonics for the whiteboard IWB.

TRAINER: DIEGO ZAFFARONI – Jolly Phonics Official Trainer
