

**Jolly
Phonics**

Introducing...

**Our  World
Nonfiction Readers**

Fully decodable books for new readers!

The **Jolly Phonics Readers Level 4 Our World** are fully decodable books for new readers. They are the fourth set of readers within the Our World series that was first launched in 2020 as part of the Jolly Phonics refresh. They have a very **carefully controlled vocabulary** and are specifically designed for children who are learning to read and write with Jolly Phonics.

- The text in these Blue Level Books (fourth level) uses only **decodable regular words** that use the letter-sound knowledge taught so far: the 42 main letter sounds and the main alternative letter-sound spellings (<y> as in *happy*, the 'hop-over <e>' spellings of the long vowel sounds, <ay> as in *day*, <ea> as in *seat*, <y> and <igh> as in *fly* and *high*, <ow> as in *low* and *now*, <ew> as in *dew*, <oy> as in *joy*, <ir> and <ur> as in *bird* and *turn*, and <al>, <au> and <aw> as in *talk*, *pause* and *saw*) and a small number of **tricky words** (frequently used words that are not fully decodable at this stage).
- All new tricky words and letter sounds used in this book are shown on the front inside cover. These can be used as a quick practice activity before starting the book.
- **Faint type** is used for silent letters, like the in *lamb*.
- **Comprehension questions** and discussion topics are included at the end of the book. These ensure that children are not only able to read the text, but also get meaning from it.

It is not just light and heat that make their way from the Sun to the Earth. **Solar** (Solar) winds from the Sun can reach Earth, too.

These winds make ribbons or curtains of green and pink light in the skies around the North and South Poles. We call these light shows the Northern (or Southern) Lights.

Norway and Sweden are good spots to see the Northern Lights.

North Pole

South Pole

axis

Did you know that the Sun is the reason we have summer and winter? As the Earth travels around the Sun, it spins on its axis (a tilted line between the North and South poles).

When the side of the planet we are on is tilted closer to the Sun, we can feel more of the Sun's heat and light. This is summer. When it is tilted away from the Sun, we feel less heat and light. This is winter.

Introduces the Tricky Words:

Teachers and parents 3

Before tackling these Blue Level books, a child will need to be able to:

- Recognise the basic 42 letter sounds, <y> as in *happy* and *fly*, the 'hop-over <e>' digraphs in words like *lake*, *these*, *lake*, *code* and *mule*, and the other alternative spellings in the leaves below;
- Read (blend) regular words containing these letter sounds;
- Recognise the tricky words shown in the flowers below;
- Use the pronunciation guides for help when reading technical terms and place names. The schwa symbol (ə) in these pronunciation guides makes a sound like an unstressed 'uh'.

Teachers and parents 5

An important part of becoming a confident, fluent reader is a child's ability to understand what they are reading. Below are some suggestions on how to develop a child's reading comprehension. Make reading this book a shared experience between you and the child. Try to avoid leaving it until the whole book is read before talking about it. Occasionally stop at various intervals throughout the book.

- Ask the child if they learnt anything in the book that they did not know before.
- Ask the child which part of the book they thought was the most interesting. Ask them to explain why this part interested them most.
- Ask the child to describe what is happening in the pictures.
- Relate what is happening in the book to any real-life experiences the child may have.
- Pick out any vocabulary that may be new to the child and ask what they think it means. If they don't know, explain it and relate it to what is happening in the book.
- Encourage the child to summarise, in their own words, what they have read.

What's in the book? 6

- How many planets orbit the Sun?
- What can you wear to protect your eyes from the Sun?
- What happens in an eclipse of the Sun?

What do you think?

- Do you think there should be more solar panels?
- What do you think would happen to us if the Sun disappeared?

Titles in this series include:
Rain and Rainbows
Whistling Winds
Thunder and Lightning
Slippery Snow
Splendid Sunshine
Clouds and Fog
